Art Unit: 1796

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 to 10, 12 to 14, 22 to 26, 77, 79 and 80, drawn to a curable composition.

Group II, claim(s) 11 to 13, 23 to 26, drawn to a curable composition.

Group III, claim(s) 15 to 17, 22 to 26, 78, drawn to a curable composition.

Group IV, claim(s) 18 ,19, 22 to 26, drawn to a curable composition.

Group V, claim(s) 20, 22 to 26, drawn to a curable composition.

Group VI, claim(s) 21 to 26, drawn to a curable composition.

2. The inventions listed as Groups I to VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the corresponding technical feature in each claim is the organic polymer having Si containing functional groups that is present in each curable composition. Such an organic polymer is well known in the art. Please see, for instance the numerous "X" references cited in the corresponding PCT application.

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Art Unit: 1796

In the event applicants elect Group I, the species are the 5 different components (a) to (e) as described therein.

In the event applicants elect Group III, the species are the components (a) and (b) as described therein

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. Due to the relative length and complexity of this requirement, the Examiner has opted to mail this restriction action.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Margaret G. Moore whose telephone number is 571-272-1090. The examiner can normally be reached on Monday and Wednesday to Friday, 10am to 4pm.

Art Unit: 1796

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck can be reached on 571-272-1078. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
